Iowa Attorney General Tom Miller gives outstanding speech on smoking, vaping and public health – listen

written by Clive Bates | 6 November 2016

Quite simply the best speech I have ever heard on tobacco and nicotine policy, science and ethics. From Tom Miller one of the architects or the United States Master Settlement Agreement and Chair of the Truth Initiative. A model of decency, humility and rigorous scientific reflection, in my opinion.

The speech was given over lunch at the Food and Drug Law Institute Tobacco Conference, 27 October 2016 in Washington DC.

General Miller's speaking notes are available here (check against delivery).
